

Climate change, poverty and food safety: *what are the challenges for Africa?*

From May 4, 2017 to May 4, 2017

Lacq Odysée Science Café -Samadet multimedia library

Jean-Marc MONTAUD, Senior lecturer in Economic Sciences at CATT/UPPA

Over the next few decades, Africa is going to be facing a sharp increase in population in parallel to a decrease in agricultural production owing to climate change. How can this risk be measured in order to define possible strategies to adapt to this scenario?
