

Economic tools for climate policies

From May 26, 2015 to May 27, 2015

Lacq Odysée Science Café -Samadet multimedia library on May 26, Cambo les Bains on May 27, 2015.

“Meeting with....” - Lycée René Cassin, Bayonne - May 27, 2015

Jacques LE CACHEUX, Professor of Economic Sciences at the UPPA

In the run-up to the Paris international conference on climate change, all the major nations announced targets for the reduction of greenhouse gas emissions, some ambitious, others less so. But the policies implemented and the instruments used are not on a par with the ambitions declared and the results recorded by the European Union, leader in this field, are unsatisfactory. What instruments should be used? How can the economy be brought around to lower pollution, longer term strategies?
